Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-3, 6-10 and 27-31 are pending. Pursuant to Applicant's February 21, 2005 Amendment and REMARKS, the previous rejection is withdrawn.

Specification

2. Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

- (1) if a machine or apparatus, its organization and operation;
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Extensive mechanical and design details of apparatus should not be given.

The abstract of the disclosure is objected to because it does not properly correlate to the claim language. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-3, 6-10 and 27-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, lines 2-3, recites "each checkout station including a respective second processor, a respective third processor, and a bar code reader." However, the reference to the second processor, bar code reader, and third processor from the remaining lines 6-11 is not clear as to which checkout station is being referenced. It is not clear if the second processor, bar code reader, and third processor from lines 6-11 reference each of the plurality of checkout stations or from a single checkout station.

Claim 7 is not a complete sentence and is not clear.

Claim 27, lines 2-3, recites "each checkout station including a respective second processor, a respective third processor, and a bar code reader." However, the reference to the second processor, bar code reader, and third processor from the remaining lines 6-13 is not clear as to which checkout station is being referenced. It is not clear if the second processor, bar code reader, and third processor from lines 6-13 reference each of the plurality of checkout stations or from a single checkout station.

Claim 31 is not a complete sentence and is not clear.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim s 1-3, 6-10 and 27-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Powell, US 6,067,526.

Powell discloses checkout stations, a bar code reader, e.g. 910, a first computer network comprising a plurality of computers and a second computer network comprising a plurality of computers, each network sending a first and second signals. Powell does not specifically disclose reading a first location, including a length, and the particular computers the signals are sent to. However, the sending of signals from one network to another, the time it takes to receive such a signal, and the data computation of such a transmission, would allow one of ordinary skill in the art to compute such a location. To have provided such for Powell would have been obvious to one of ordinary skill in the art. The motivation for having done such would have been to determine where the card is being used when processing an electronic transaction.

7. Further pertinent references of interest are noted on the attached PTO.

8. Applicant's Information Disclosure Statement received July 7, 2004 has been reviewed. Note attached PTO-1449.
